BPP

Level 5 Data Engineer Higher Apprenticeship

Induction Learning Session
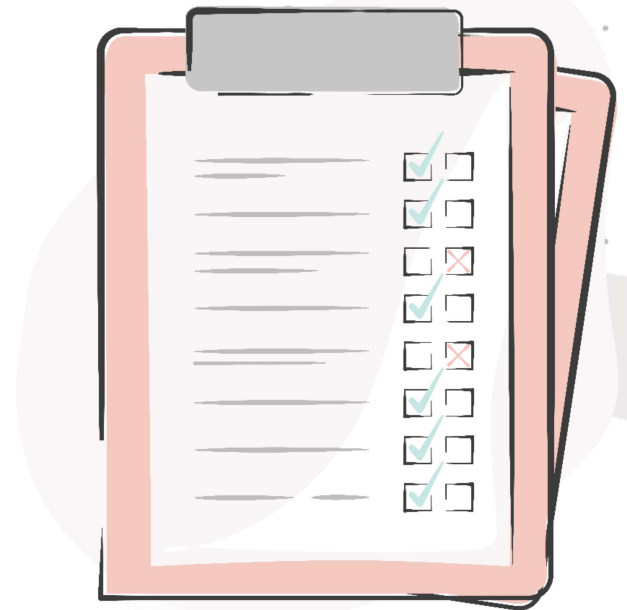

Using Adobe Connect

Webinar Agenda

This webinar will include the following:

- Using Adobe Connect

- Icebreaker Activity – Orders of magnitude of data

- An Interactive Poll

- Discussion - Data challenges in your organisation

- Activity - Apprenticeship standard

BPP

Session aim and objectives

By the end of this session you should be able to:

Recognise the functionality of Adobe Connect

Participate in Adobe Connect online polls

Explain how to participate in a Data Engineering learning activity

BPP

Activity – Measuring Data

We will use the chat for this ice-breaker.

Your tutor will guide you through this activity.

BPP

Interactive Poll

"Describe in a few words what you are most looking forward to learn during your Level 5 Data Engineering programme."

BPP

Identify an example in your organisation where data could be used more effectively

Moment to reflect individually

Think about **why** this is happening…
is data being used ineffectively? Is there a new opportunity?

Share and discuss ideas   *10 mins*

Tutor feedback

BPP

Data in the workplace

"Which of the following categories best describes the challenge that you have identified?"

a)   Poor data quality

b)   Data not available

c)   Multiple sources of truth

d)   Too much data

e)   Unclear on capabilities / tools

f)   Lack of suitable technology / tools

g)   No strategy / data is not viewed as an asset

h)   Disconnect between business and technology

i)   Lack of skills / support

Come up with a way in which you or your organisation could use this data more effectively

As a Data Engineer, using your technical knowledge and skills, how could you improve the effectiveness of data use in a business?
